

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

BIENNIAL REPORT

OF THE

BOARD OF STATE AUDITORS

FOR THE

TWO FISCAL YEARS ENDING JUNE 30, 1920

BY AUTHORITY

LANSING, MICHIGAN
WYNKOOP HALLENBECK CRAWFORD CO., STATE PRINTERS
1921

*exch.
Ohio St. R. R. Co.
3.19.1921*

Lansing, Michigan,
January 1, 1921.

To His Excellency, Alex J. Groesbeck,
Governor of the State of Michigan.

Sir—

In compliance with Section 152 of the Compiled Laws of 1915 we have the honor to submit a biennial report of the Board of State Auditors for the two fiscal years ending June 30, 1920.

You will notice Section 152 calls for an annual report to be submitted to the Legislature at the commencement of its session in January. Inasmuch as the Legislature did not meet during January, 1920, the Board deemed it wise not to prepare an annual report but to make the same biennial, thus eliminating the additional cost. You will please note that the Board, following its custom inaugurated June, 1918, has condensed the report on the same theory as advocated at that time that volume does not always count for efficiency in making up reports. If the old custom that has prevailed in this state for years had been followed this report would have made better than 1,500 pages and the cost would have been many times more than in its present form. In the opinion of the Board this report contains the necessary information in condensed form.

The Board are also pleased to report that a large number of the state departments and institutions have followed suggestions made by the Board in reducing not only the volume but the number of annual reports printed. Some of the departments and institutions have gone so far, upon suggestion of this Board, as to eliminate entirely the publishing of annual or biennial reports where the law specifies that reports shall be filed with the Governor and does not provide for printing any special number of copies. It is the opinion of this Board that a typewritten copy filed with the Governor of this state is sufficient for the needs of many of the state departments and institutions.

You will also please note that the minutes of the meetings of this Board are not made a part of the report for the reason that owing to the large number of emergency claims investigated and the large number of hearings for Civil War bounty held the publication of these minutes would mean a large expense and not necessary, in the opinion of the Board.

The saving made by this Board by cutting down and the abolition of annual and biennial reports will be shown in a special report made by our Superintendent of Publications to the Legislature convening on January 5, 1921. The increased cost of printing, binding and paper has been so rapid during the past two years that the cost of state printing would have mounted to a decidedly larger sum had it not have been for the law passed during the 1919 session of the Legislature giving this Board supervisory powers over printing and binding. This law can be made decidedly more effective, however, by a better compliance on the part of some state departments, institutions and boards.

One element of cost which heretofore has probably not been taken into consideration in arriving at the cost of printing reports is the matter of the cost incurred in compiling such reports and the distribution of the same after they are printed. In other words, the cost of paper, printing and binding is not the entire cost. Some reports require the services of a number of clerks for months in compiling information that goes into the report.

When distribution is made there is the postage, express or freight in getting the reports distributed and the services of state employees in making this distribution.

This Board has no figures available to show what this additional cost would amount to, but that it is a large item nearly equal, if not in excess, of the cost of printing and binding and paper, is evident.

Respectfully,

COLEMAN C. VAUGHAN,

Secretary of State,

THOMAS E. JOHNSON,

Superintendent of Public Instruction,

FRANK E. GORMAN,

State Treasurer,

Board of State Auditors.
